We bring good things to living...

At Schenectady General Electric our people combine their talents to design, build, install and service the power generation systems of today.

Many other Schenectady GE people devote themselves to research and development in energy sources and systems for the future.

The good things in life will continue to flow from our society's ability to generate and use energy wisely and efficiently. At Schenectady General Electric, many thousands of your neighbors are dedicated to making the future even more productive for an electrically powered America.

Long distance calls, for example.

A lot of travel agencies charge you extra for the extra long distance phone calls they make while planning your trip. We don't.

At Dorp Travel, we'll never charge you for our professional services—from making airline reservations to acting as consultants so you'll get the best possible trip.

Sure, our attitude goes against the conventional wisdom.

That's because it's only common sense.
